

Every AI voyage needs a navigator.

LAUNCH TO PRODUCTION

From first idea to production, with you all the way.

AI AND SOFTWARE STUDIO

WHAT WE BUILD

Six things we're **very** good at.

01 **Gen AI**

AI agents, workflow automation, RAG assistants and document intelligence.

02 **Machine learning**

Forecasting, recommendations and detection on your data.

03 **Computer vision**

Models that see, from cameras, drones and scans.

04 **Audit and harden**

Built fast with AI? We make it secure and affordable.

05 **NLP and speech**

Language and voice, across Indian and global languages.

06 **Custom software, Web and Mobile apps**

The software around the AI, end to end.

AI is where we lead. The rest makes it useful.

NEXT STOP: YOU

Let's build the real one.

ADMIT ONE

NO. 0001

A 30-minute call with an architect.

No sales pitch. Bring your messiest use case.

SEE OUR WORK SAVE OUR CONTACT

The route from idea to production.

Start with an idea, a messy process or a demo that almost works. We architect the route and sail it all the way.

HALLUCINATION RIDGE
Crossed with evals and KPIs.

DESTINATION
Production Harbour

Reliable, measurable and yours to keep.

03 · EVALUATE
Prove it works

Evals, KPIs and guardrails, red-teamed across 14 attack types.

Treasure: AI your team actually uses.

COST CLIFFS
Smarter routing, caching, leaner prompts, right-sized cloud.

01 · STRATEGY
AI strategy and architecture review

Pick the right first use case, check your data, leave with a plan.

CANNON DRILLS
14 attack types fired at your AI. Guardrails hold.

QUICK-WIN ISLAND
Small, but real.

04 · OPERATE
Run and improve

Observed, cost-optimised, documented and handed over.

KRAKEN OF TECH DEBT
Lives under rushed code.

02 · BUILD
Working pilot
Real data, real users, one workflow end to end.

pilot swamp the usual way: round and round

YOU ARE HERE
An idea, or a demo.

GRAVEYARD OF ABANDONED PILOTS
RIP, lovely demos.
